

PERAONAL RESUME

Information

Name: Gong Chen

Date of Birth: December 12, 1994

Nationality: Chinese

Email: gong.chen@stud.uni-heidelberg.de

Current Affiliation: Heidelberg University, Medical Faculty, Germany

Research Field: Translational Oncology, Tumor Plasticity, Single-cell Transcriptomics

Education

2022-2026 Heidelberg University MD in General, Visceral and Transplantation Surgery

2021-2022 KU Leuven Doctoral Training in Biomedical Sciences (Medicine)

2018-2021 Jiangsu University Master of Surgery

2013-2018 Youjiang Medical University for Nationalities Bachelor of Medicine

Research

Cancer Cell Plasticity Research

Research Topics: Osteogenic phenotypic reprogramming in pancreatic cancer, MAPK–ERK signaling, Functional validation using CRISPR, RNA sequencing

Single-cell Transcriptomic Analysis

Research Topics: Gastric cancer heterogeneity, Cell state identification, Metabolic reprogramming, Machine learning analysis

Academic

TransMed Journal, Youth Editorial Board Member, (2026–present)

Publication

1. **Chen G**, et al. Single-cell transcriptomic analysis identifies an OLFM4-associated gastric cancer cell state with palmitoylation-related signatures and altered metabolic activities. *Biomolecules*, 2026, 16:880. (DOI: 10.3390/biom16060880; IF: 5.6)
2. **Chen G**, et al. Osteogenic-like phenotypic reprogramming is associated with reduced malignant behaviors in pancreatic cancer cells involving MAPK–ERK signaling. *International Journal of Molecular Sciences*, 2026, 27:4725. (DOI: 10.3390/ijms27114725; IF: 5.6)
3. **Chen G**, et al. Microwave Synthesis of Ultrasmall Gold Nanoparticles, Their γ -Globulin Interaction and Subsequent Effects in Hepatocellular Carcinoma Cells. *BMC Chemistry*, 2026 Jul 2;20(1):143. (DOI: 10.1186/s13065-026-01868-0; IF: 5.1)
